Students Research Policy

Research and developmental activities create and disseminate new knowledge in a range of fields, promote innovation, and will motivate better learning and teaching among faculty members and students at our institute as they are often incorporated into the courses. Research is the foundation of knowledge that brings new energy, builds state-of-the-art facilities, promotes research publications, develops collaborations, and becomes a part of an active community that shares the mission objectives. Researching is a process that not only improves your skills but also teaches you a lot and broadens your knowledge, even though we could get to conclusions we already know. A deeper comprehension of the subject matter, a greater understanding of your issue, and the ability to ensure that your writing is well-informed and supported can all be attained through conducting research.

1. Objectives of Research-

- **Enhancing Knowledge-** New avenues for knowledge discovery can be reached through conducting research and producing research papers. Research will have a chance to develop your writing abilities when writing a research paper, and in the future, you will be able to produce a better piece of writing that will impress others. These skills would certainly be useful for getting high package placements.
- **Adds Value to Your Resume-** A research paper helps you to find more knowledge about the field you are researching, so you can learn something new and fascinating about the discipline that you can use for work later. Besides expanding your knowledge in each field, Research will enhance your CV and make you stand out as a candidate. Therefore, research is essential since it enhances the value of your CV and demonstrates the talents you currently possess—skills that they may be seeking for.
- **Raising Awareness-** Conducting research enhances your knowledge and helps you boost your analytical and critical thinking skills. As you choose your topic and do the research, you may reach new conclusions that spark discussions in academic work. Developing critical thinking is important not only for the writing of research papers, but also for many other duties. To become a successful person and a specialist in your field, becoming a better thinker is something that is certainly important.

- **Important for Higher Studies-** When students pursue postgraduate studies such as an M. Tech or MS degree in India or overseas, having strong research experience at the undergraduate level is crucial.
- **Enhancement of Practical knowledge-** Research is crucial for students to improve their practical knowledge. High package employment in R&D agencies such as DRDO/ISRO, etc., are available to students if they are having good research background.

2. The Vision of the Institute for Research

To achieve excellence in research and create an outstanding climate of support for researchers, broadly enabling research advances to meet national and international needs.

3. The Mission of the Institute for Research

- To motivate faculty members and students to concentrate on research-related activities to publish research articles in reputed journals and Scopus indexed conferences
- To pursue efforts to write books and monographs for publication by international and national publishers of repute.
- To spark faculty members' interest in joint research projects with colleagues at prestigious national and international universities.
- To encourage faculty members and students to submit proposals and secure funded research projects from various funding agencies in India and abroad.
- To undertake consultancy projects sponsored by the government as well as private, industrial, and other organizations.
- To encourage creativity in the minds of the faculty members and students so that they make original contributions by way of products, concepts, etc., and obtain patents.
- To reach out to national and international professional societies.

4. Policy of Research Incentives Scheme

4.1 Scope of the Scheme

Undergraduate and postgraduate students of KIET Group of Institutions can publish their original research work.

4.2 Incentives for Research Publications in Journals

To further promote the intensive research culture among the students of KIET, it is intended to adopt the incentive policies under the vision of the research institution. KIET has already adopted the incentive policies for SCI, SCIE, SSCI, AHCI, SCOPUS, eSCI and CCR Expanded indexed international journals, but to make the research more adaptive, it is required to give more freedom in the regulation of SCI publications. In view of the above, **students may claim a maximum of 5 Research Publications incentives for Journals in an academic year as mentioned in different categories of Table-1.** The primary objective of this incentive scheme is to motivate the students of our Institution to undertake quality research and other related activities.
